- 01 Introduction ZGF
- O2 Facilitation Needs
 Assessment
 ZGF
- 03 Record Review ZGF
- O4 Preview DevelopmentAssessment FrameworkZGF
- **05** Next Steps ZGF

ESC Role

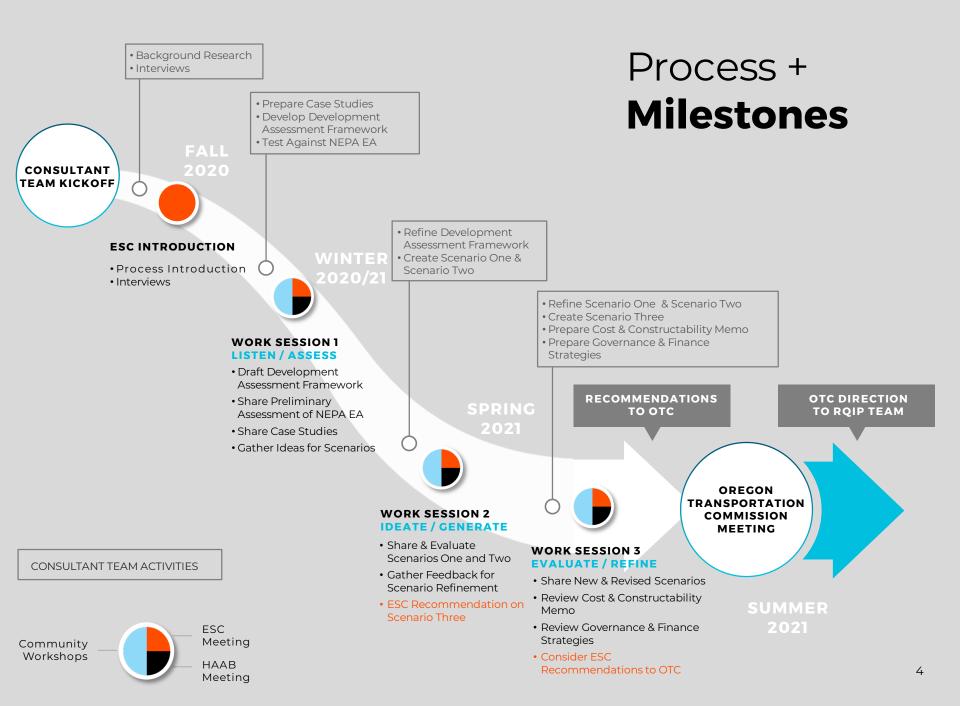

Directing the Independent Highway Cover Assessment consultant team in assessing the highway cover design and recommending scenarios to be presented to the OTC for direction and approval.

HC3 Role

The HC3 will serve as the staff working group to support the Independent Cover Assessment Team's development and refinement of the three development scenarios and to review and provide input on the deliverables (to be considered by) the ESC and OTC.

ICA Role

The consultant team is solely responsible for the analyses developed and presented to the ESC, and will frame decisions, but not make recommendations.

Facilitation Needs Assessment Framing

- Task 3.1 Facilitation Needs Assessment that informs the Task 3.2 Implementation of Facilitation Needs Assessment.
- Clarification on remaining questions.
- Update on community engagement activities.

Facilitation Needs Assessment **Purpose**

- Define Independent Cover Assessment (ICA) Process
- Integrate Cover Public Engagement with I-5 RQ Public Engagement
- Define ICA Independence
- Draft a Highway Cover Coordinating Committee (HC3) Charter
- ESC alignment with approach in the Facilitation Needs Assessment
- Many items have already been addressed in prior ESC meetings

Facilitation Needs Assessment Remaining Topics for ESC

- Definition of "Community" for PI Work
- Restorative Justice: Contextual Expectations for Covers
- ICA Role and Independence in ESC Charter
- Highway Cover Coordinating Committee (HC3) Role in the ESC Charter
- Additional HC3 Members

Facilitation Needs Assessment ICA Independence in ESC Charter

The ICA team proposes the ESC <u>add</u> the following to the ESC Charter:

The ESC directs the Independent Highway Cover Assessment consultant team (ICA) in assessing the highway cover design and creating the highway cover design scenario(s) to be recommended to the OTC for direction and approval.

The term "independent" means the ICA team is not controlled by ODOT and is guided by the ESC. The ICA team is objective and impartial. It advocates for a transparent and inclusive process, but it does not advocate for any stakeholder, their interests, or for a particular outcome. Being objective means the ICA team calls "balls and strikes" as it sees them.

Facilitation Needs Assessment HC3 Role in ESC Charter

ESC should consider <u>adding</u> this language to the ESC Charter:

The Highway Cover Coordinating Committee (HC3) will serve as the staff working group to support the ICA team's independent development and refinement of the three development scenarios. It will review and provide input on the deliverables to be considered by the ESC for its recommendation to the OTC. The HC3 will provide a forum for the discussion of ICA work progress, schedule, change management, and other relevant topics. It will also provide meaningful feedback to the ICA team on the cover process and how information is communicated and fits into the overall I-5 RQ process. The HC3, with representatives from ODOT, Metro and PPS (and information made available to the City, County, and Albina Vision Trust). The ESC and HAAB facilitators, along with members of the Owner's Rep team, will participate for coordination purposes only.

ESC Discussion Questions:

- Is this language appropriate for the ESC Charter?
- Any suggestions for improvement?

Facilitation Needs Assessment Additional HC3 Membership

Confirming ESC's decision to add additional HC3 members/voices.

Conceptual Proposal: Increase existing HC3 membership to include the following perspectives.

- 1. Representative(s) from the ESC selected by the ESC for purposes of providing ICA oversight
 - Consider adding non-governmental, community, and/or business voices
- 2. Representative(s) from the HAAB, to be selected by the HAAB
- Representative(s) from the community at large, who have technical experience and/or insights that are representative of the Historic Albina Community, to be selected by the ESC from leaders in the community

Facilitation Needs Assessment Additional HC3 Member Criteria

- Connections to community and community organizations
- Experience with transportation policy and projects
- Experience with governance and finance
- Experience with community cohesion and community uplift
- Experience with urban revitalization

Facilitation Needs Assessment Additional HC3 Member Process

- ESC appoints ESC member(s) and community member(s) during the January 2021 ESC meeting
- HAAB meets and appoints its own member(s) in January 2021
- If requested by the ESC:

ICA team can present list of candidates to the HC3 in a criteria matrix

HC3 can vet community candidates for ESC approval

HC3 or ICA team can contact potential candidates to confirm interest

ESC Discussion Questions:

- Suggestions on Criteria?
- Suggestions on Process/Timing?

Community Engagement Outreach Categories

Group A Nearby Businesses

Group B Nearby Non-Profit Organizations / Schools / Churches

Group C Residents of Albina Neighborhoods

Group D Members of Historic Albina Community, with emphasis on Black community members & organizations

Group E Members of the General Public

Group A, B & C

Broad-based Community of Albina Neighborhoods

Group D

Historic Albina & Soul District, African American / Black American stakeholders, and POC community members with Historic Albina connections

Business Community Professional Services Restaurants Retail Community
Facing High
Barriers
Physical / Financial
Language

Organizations
Community
NonProfits/Churches
Schools

Displaced
Community
w/ Deep Albina
Roots
Families

Group E

Public At-Large; community members who are interested in the Highway Cover Project who live/work outside of the Albina Neighborhoods

Facilitation Needs Assessment Discussion 10min

- ESC Charter
- Additional HC3 members
- General alignment with outreach categories
- Items to carry to next meeting:

Record Review **Framing**

- Record Review is a shared document for project understanding serving ESC work.
- Urban Design and Technical Record Review.
- Observations found in the Record Review will be included in the Development Assessment Framework.

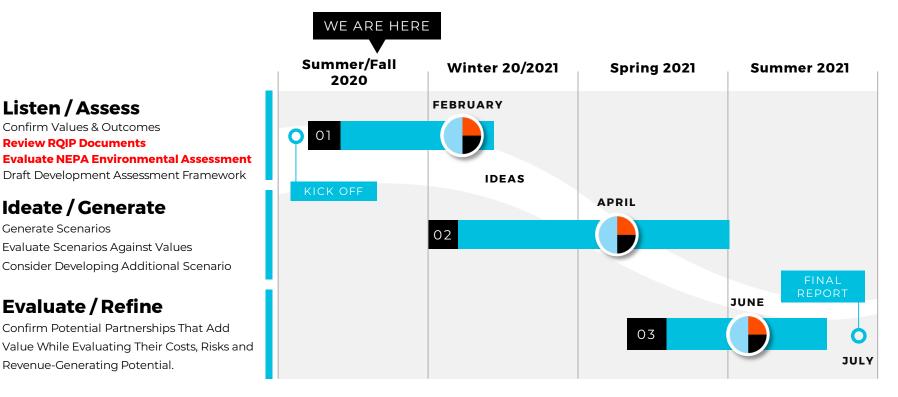

Record Review **In Context**

Listen / Assess Confirm Values & Outcomes **Review RQIP Documents Evaluate NEPA Environmental Assessment** Draft Development Assessment Framework **Ideate / Generate** Generate Scenarios 02 **Evaluate Scenarios Against Values** Consider Developing Additional Scenario **Evaluate / Refine**

Confirm Potential Partnerships That Add

Revenue-Generating Potential.

Figure 32:EA Potential Development Sites

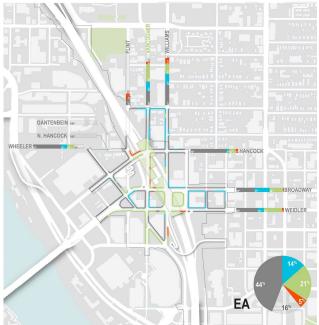

Figure 34:Albina Vision Proposed potential development sites

Plan Comparisons

Active Frontage

Passive Frontage

parking lot, blank wall, wall with windows above standing or sitting eye height, vacant lot

Active Frontage*

building with windows and doors facing the street, plaza

Vegetated Frontage

landscaped area; trees and shrubs on private property, excludes street trees in right-of-way

Freeway Frontage

walkway abutting I-5 or with prominent views to and noise from I-5

No Frontage lack of sidewalk

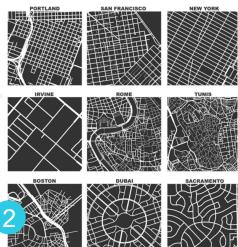

*The N/NE Quadrant Plan 2035 Performance Target for active street edges is: **At least 40%** of street frontages within the Lloyd District are occupied by buildings oriented to the street.

Urban Design **Lens**

Urban design principles we have applied in our assessment and observations.

- Continuity
- **2** Connectivity
- **3** Character + Identity
- **4** Vitality
- **6** Resilience

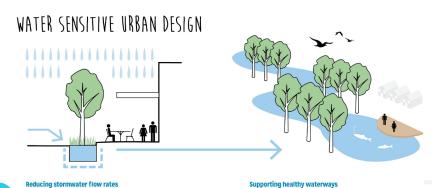

Continuity

Vitality

Connectivity

Character + Identity

Water Sensitive Urban Design can reduce and slow runoff from storms by as much as 5% to reduce local and downstream flood risk

Supporting healthy waterways

Water Sensitive Urban Design can reduce by 80% pollutant particles from entering our creeks, rivers and dams

Urban Resilience

Urban Design Lens **Historic**

Continuity
Buildings are similar

Buildings are similar in scale, mature neighborhood tree canopy, consistent street grid provides similar streetscape.

- Connectivity
 Small blocks and a well-connected street network.
- 3 Character + Identity
 Small-scale, diverse land uses, consists of a large amount of housing. People are rooted through their residence, profession and social networks within the Albina Community.
- Vitality
 Broadway and Union Ave. are a major connectors proving access to retail and commercial businesses.
- The green space at Harriet Tubman Middle School supports the physical and mental health of the community.

Urban Design Lens **EA**

Continuity

The proposed changes at the interchange alone do not address continuity within the broader neighborhood.

2 Connectivity

Two additional connections have been made at Hancock/Dixon and the Clackamas Pedestrian Overcrossing. The covers also provide additional physical and visual connectivity.

3 Character + Identity

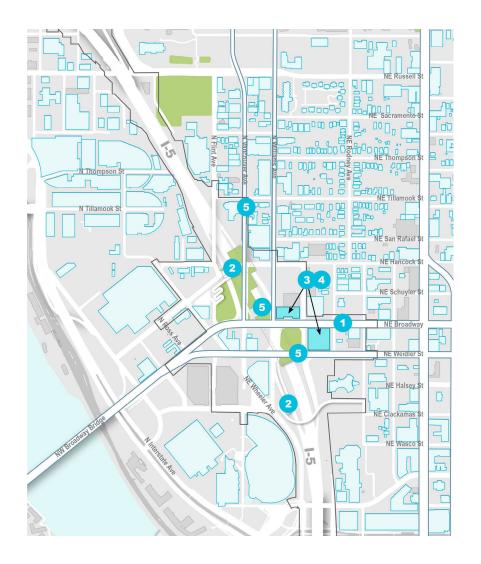

The covers' program could add to the character and identity of the neighborhood. Development associated with the RQIP could serve the nearby community and have an impact on the character and identity.

Vitality

The additional connections with new development could provide more opportunities for businesses and street activity. The covers can provide space for community activities.

Resilience

The covers' open space can provide access to green and natural environments and reduce pervious surfaces and runoff. Increased connections and enhanced bicycle/pedestrian facilities can promote active transportation.

Scenario **Development**

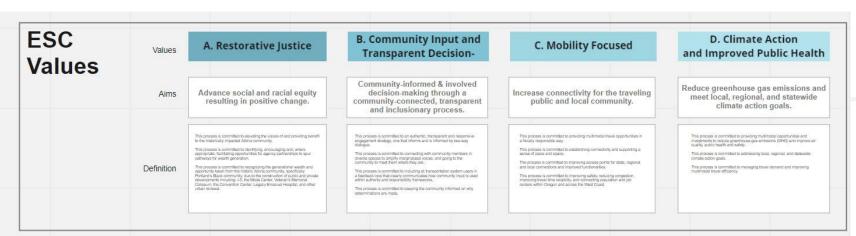

ESC Values +

Outcomes

ICA team is using ESC values to organize ESC identified outcomes along with outcomes identified during our Record Review.

1. Urban Design Record Review Outcome: **Under ESC Restorative Justice** - Secure project benefits to the African American community and physical assets for community building should be clearly defined or targeted in the EA. Adverse cumulative effects to these community assets should be assessed, evaluated, and valued.

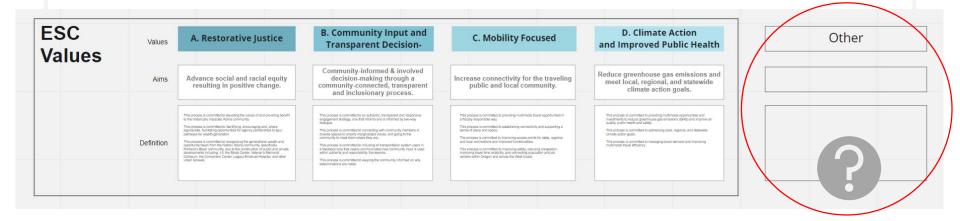

ESC Values +

Outcomes

Not all outcomes identified in the Record Review fit neatly into the ESC values. The Development Assessment Framework may benefit from additional categories of outcomes.

6. Urban Design Lens Record Review Outcome: Urban form should communicate the ethnic, racial, or cultural identity of the Historic Albina Community through the organization and appearance of the rebuilt neighborhood.

Development Assessment Framework **Discussion**

Next Steps

- ICA will propose a strategy to organize the outcomes that don't fall logically under the four ESC Values and present/review with the ESC in January.
- ICA will propose key outcomes that support a vision for the Historic Albina Neighborhood to discuss during Work Session 1.

Facilitation Needs Assessment Defining Community

The Rose Quarter/Lower Albina is a major regional node within the central city, so the concept of community can be construed quite broadly to include those who live, work, and learn in the areas near the Rose Quarter Interchange, as well as those who visit the area for commerce, recreation, and entertainment. Given the history of urban renewal in Lower Albina, and guided by the ESC Values and Outcomes, our definition of community emphasizes a racial equity lens because the historic Albina African American communities were displaced and deprived of generational wealth creation. The Independent Cover Assessment can help to right these past wrongs by elevating the voices of Black Portlanders and communities of color to ensure that the benefits of highway cover scenarios deliver benefits prioritized by this historically impacted community.

Facilitation Needs Assessment Community: What this means

- Focus is on the Black/African American Historic Albina Community
- Black/African American voices will be elevated, particularly with respect to Restorative Justice issues
- Historic Albina includes the neighborhoods along I-5 from the project area through historic Vanport
- Work closely with the HAAB
- Include members of other historically marginalized groups
- Include others who live, work & play in the area

ESC Discussion Questions:

- Is this definition and its meaning appropriate for the ICA work?
- Any suggestions for improvement?

Facilitation Needs Assessment Restorative Justice Expectations for Cover Scenarios

- Scenario process will provide opportunity to place special weight on Restorative Justice/Wealth Generation for Black Portlanders
- To establish realistic expectations, the ICA team proposes the following statement for ESC consideration:
 - Establishing and maintaining trust involves the setting of clear expectations about what the covers can and cannot deliver
 - Explore cover scenarios, their design, and how their development could be financed and governed in collaboration with the community
 - o ESC's cover recommendation is a key step in providing restorative justice
 - Sets stage for the project partners to implement the governance and finance work needed in the future to deliver and sustain real progress and effective community building

ESC Discussion Questions:

- Is this statement appropriate for the ICA work?
- Any suggestions for improvement?

Facilitation Needs Assessment ICA Independence in ESC Charter

The ICA team proposes the ESC <u>add</u> the following to the ESC Charter:

The ESC directs the Independent Highway Cover Assessment consultant team (ICA) in assessing the highway cover design and creating the highway cover design scenario(s) to be recommended to the OTC for direction and approval.

The term "independent" means the ICA team is not controlled by ODOT and is guided by the ESC. The ICA team is objective and impartial. It advocates for a transparent and inclusive process, but it does not advocate for any stakeholder, their interests, or for a particular outcome. Being objective means the ICA team calls "balls and strikes" as it sees them.

Facilitation Needs Assessment ICA Independence: What this means

- ICA will complete its scope based on its independent professional judgment and expertise
- While ODOT administers the scope, any substantive changes, or clarifications to it shall be reviewed by HC3 and, if necessary, the ESC for its recommendation
- The ICA team will interact with the ODOT technical team as needed to collect data or other resources, but ODOT will not direct the ICA team's outcomes
- The ICA team will not act on conversations that do not occur in public without direction of the HC3 or ESC
- The ICA team may use ODOT meeting support to avoid duplication of effort and increase efficiencies
- The ICA facilitator will regularly monitor and report both to the APD and the ESC on compliance with the above

ESC Discussion Questions:

- Is this language and what it means appropriate for the ESC Charter?
- Any suggestions for improvement?
